

Parallel Lines and Transversals

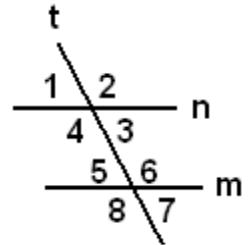

► **Corresponding Angles Postulate (new postulate):**

If a transversal cuts two lines so that the corresponding angles are congruent,
then the lines are _____

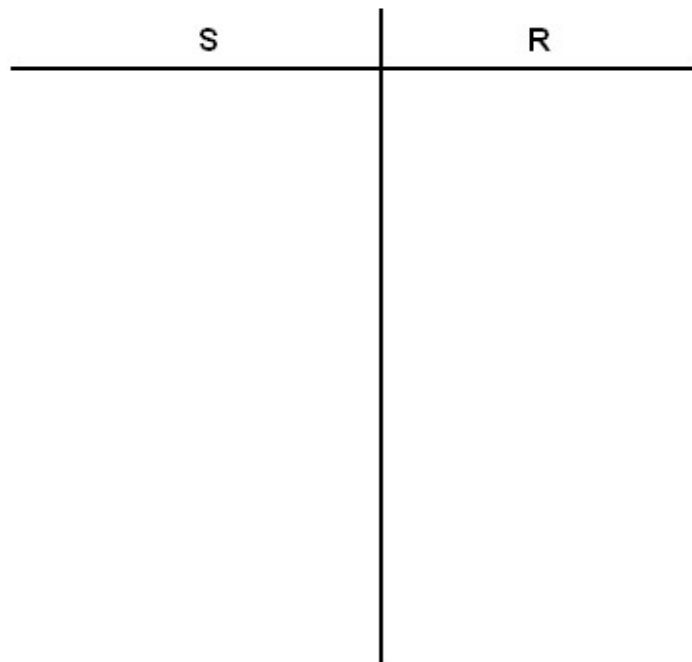

► **Alternate Interior Angles Theorem (new theorem):**

If a transversal cuts two lines so that the alternate interior angles are congruent,
then the lines are _____

Given:

Prove:

► **Same-Side Interior Angles Theorem (new theorem):**

If a transversal cuts two lines so that the same-side interior angles are _____,
then the lines are _____

► **Alternate Exterior Angles Theorem (new theorem):**

If a transversal cuts two lines so that the alternate exterior angles are _____,
then the lines are _____
