

Side-Splitting Theorem

"A line parallel to one side of the triangle splits the other two sides proportionally."

[EX 1]

[EX 2]

Other Results (Corollaries):

- (A) Three or more parallel lines split two intersecting transversals proportionally.
- (B) Two lines are parallel if and only if they split transversals proportionally.

[EX 3]

w = _____

x = _____

y = _____

z = _____

[EX 4]

x = _____

y = _____

[EX 5] Which lines are parallel in the given figure?
